

Supplier Scorecard

Supplier performance will be measured and reported on a monthly basis for “Quality” and “OnTime Delivery” as follows.

- **Quality:** The Quality rating is calculated as a percentage of conforming parts delivered divided by total parts delivered during a twelve month period.
- **On-Time Delivery:** On-Time Delivery is calculated by using order line fill, whereby all quantity on an order line must be delivered on-time to be considered 100% on-time. The aggregate of all lines drives the overall metric. Supplier is considered on-time if all requirements of a given order line are delivered on, before, or one day after the confirmed promise date on the purchase order.

The On-Time Delivery rating is calculated as a percentage of on-time order lines divided by the scheduled order lines during a twelve month period.

Superior	Outstanding	Satisfactory	Un-Satisfactory
99.5% to 100%	99.0% to 99.4%	98.0% to 98.9%	<98.0%

Questions/concerns should be directed to the following:

Quality
